RE: Water Quality Data and Information for 2008 Integrated Report [303(d)/305(b)]

Dear Messrs. Davis and Karkoski:

Pacific Gas and Electric Company (PG&E) is pleased to provide the enclosed water quality data and information for the 2008 integrated report for the list of impaired water segments and surface water quality assessments. In addition to a CD containing electronic copies of the information, we have included a table which summarizes each report (FERC project, report title, water segment, and summary of results).

Within the next month, PG&E will submit additional information in a fact sheet format that outlines our requests for delisting with a detailed rationale and specific page references to the reports submitted today. We also plan to submit information concerning the segmentation of river systems and the use of the temperature guidelines from the Sullivan report (*An Analysis of the Effects of Temperature on Salmonids of the Pacific Northwest with Implications for Selecting Temperature Criteria*, by Sullivan K., D.J. Martin, R.D. Cardwell, J.E. Toll, and S. Duke. Portland OR, 2000). After this submittal, we plan on setting up a meeting with you to review the information.

If you have any questions, please call Sara Everitt of my staff at 415-973-0707.

Sincerely,

Tammie R. Candelario
Senior Director
Environmental and Technical & Land Services
